

SPRINGFIELD TOWNSHIP SPEED HUMP PETITION

In order for the installation of speed humps to be considered on _____ Rd/St,
between _____ and _____, the following
procedure shall be followed:

- 1) Petition receives signatures from what appears to be 70% of households on said street.
- 2) A postcard survey will be mailed to each household on said street.
- 3) If 70% or more of the postcards are in favor of having speed humps, then the Director of Public Service will order a traffic study.
- 4) Justification for the need of speed humps or other traffic control devices for the Township shall be determined upon the basis of an engineering and traffic investigation.
- 5) The Director of Public Service will present to the Board of Trustees the findings of the engineering and traffic investigation.
- 6) Based on the investigation, the Board of Trustees will consider the installation of permanent speed humps on said street.
- 7) If the Board of Trustees approve, the permanent speed humps will be installed when able to be funded.

The Springfield Township Board of Trustees shall consider average daily traffic, professional input, and any other pertinent factor(s) during the approval process.
